TRAN VAN TRUONG

Unity Game Developer · C# · 5+ years

Ho Chi Minh City, Vietnam · tranvantruong.dev@gmail.com
tranvantruong.pages.dev · github.com/tranvantruongdev

Unity game developer with 5+ years of mobile experience across three launched Enish titles. Owned Battle Content and the gacha result presentation for **Yowamushi Pedal Resonance Pedaism**; works across live-service UI, gRPC/Protobuf integration and Go server features. Also builds AI-agent tooling for bug investigation.

SKILLS

Unity & C#	Unity, C#, UGUI, TextMeshPro, UniRx, MVC, State Machine, Spine, FinalIK
Integration	gRPC, Protobuf, master-data binding, API-driven UI
Server	Go, Docker (game server work since Sep 2026)
Delivery	Git/GitHub, Jenkins, WebGL builds
AI & Languages	Claude Agent SDK, Node.js, Claude Code, Cursor, Codex; Vietnamese (native); English (basic conversation)

EXPERIENCE

Enish Vietnam · Unity Game Client Developer — Feb 2023 – Present

- Built a debug tool that resets players' shop-item data to speed up QA testing; configured Jenkins paths and build settings to produce WebGL builds after a project migration.
- Built an AI-agent workflow to investigate tickets across the Unity client and Go server, with human approval required before a coding agent can push.
- Merged 238 PRs during the Jan–May 2026 launch run.

Yowamushi Pedal Resonance Pedaism · Jun 2025 – present · Release announcement

- Owned Battle Content for about a year after a short handover; shipped race lists, detail dialogs and match-state logic for the Jul 2026 launch.
- Built the gacha result presentation with Spine, voice/BGM timing and skip behavior; more than 20 banners shipped since launch.
- Integrated Battle Content and PvP/GvG states, rewards and APIs through gRPC/Protobuf and master data; fixed resume recovery after protocol changes.
- Since Sep 2026, updated Battle Content on the Go game server and built a tool to grant shop passes to players affected by a bug.

De:Lithe Last Memories · From Feb 2023

- Built shop features (shop-tab categories, Limited Shop), Halloween 2024 and minigame events.

Laid-Back Camp All-in-one!! · Jun 2023 – Jan 2024 · 30+ person team

- Developed gameplay and event systems from launch onward, using MVC and State Machine patterns.

Helios Entertainment · Unity Game Developer — Dec 2021 – Dec 2022

- Implemented MetaMask wallet and blockchain features for Luna Rush; developed mobile-game features, internal production tools and client-server integrations.

EBizWorld · Game Developer — Jan 2021 – Dec 2021

- Built responsive mobile-game UI and tutorials, and integrated AdMob.

SELECTED PROJECTS

- **Cadence Club** · Unity 6 · feature-complete, release pending · Case study — Pure-C# match-3 board with an event-driven Unity view; 30 levels tuned in 200 bot runs each.
- **Night Courier** · Unity 6 · feature-complete, release pending · Case study — Momentum-based survivor game; pure-C# swarm uses parallel arrays and a hashed spatial grid, with allocation tests at 100/300/500 drones.

EDUCATION

Bachelor of Software Engineering · PTIT · 2016–2021
